

Project Demo Planning

Date	6 July2026
Team ID	
Project Name	Plugging into the Future : An Exploration of Electricity Consumption Patterns
Maximum Marks	1Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	. Introduce the project, objectives, and overall system workflow.	1	Vinukonda Varshitha
2	Problem Statement	Explain the need for an electricity consumption analytics and load forecasting system.	1	Gumma Anusha
3	Data Preprocessing & Model Training	Explain dataset preprocessing, feature encoding, Random Forest model training, and evaluation.	2	Vinukonda Varshitha
4	Login Authentication	Demonstrate the user login functionality and secure system access.	1	Gumma Anusha
5	Live Application Demonstration	Enter power parameters, generate load predictions, display forecasting metrics, and show final consumption patterns.	3	Gumma Anusha

6	Prediction History & Dashboard	Demonstrate SQLite database storage, power consumption history logs, and dashboard load analytics.	2	Vinukonda Varshitha
7	Conclusion & Q&A	Summarize the project insights, discuss future grid enhancements, and answer questions.	1	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the project objective, electricity load challenges, and expected outcomes.
2	Solution Over view	Explain data preprocessing, Random Forest forecasting model, Flask application, and system architecture.
3	Live Feature Demonstration	Demonstrate user login, power parameter data entry, demand forecasting results, consumption trends history, and dashboard analytics.
4	Q & A Session	Answer questions related to machine learning models, Flask application, database integration, and future smart grid enhancements.
